

CHOLET FACTORY VISIT

IMMERSION IN THE HEART OF PRODUCTION

JEANNEAU

Have you ever wondered how the manufacturing process of your JEANNEAU Sun Odyssey works behind the scenes? Our teams welcome you to the heart of our Cholet factory in Les Pays de la Loire to find out.

As you go behind the scenes of Cholet's production site you will enjoy a detailed and fascinating presentation of the Sun Odyssey design.

This document contains all the practical information you need to prepare and guide you during your visit, which we hope will be the best possible.

Enjoy your visit!

FACTORY ACCESS

FROM NANTES

Take the RN 249 in the direction of Cholet.

Continue for 50 km.

Take exit 8 "Cholet-centre- La Séguinière".

At the roundabout, take the second way. Continue for 1.1 km.

At the roundabout, take the third exit to the left.

Continue straight ahead on ring road (pass two roundabouts).

At the third roundabout, continue straight ahead (bd du poitou).

After spotlight, turn to the left. At the roundabout, take the first right.
Continue for 170m.

FROM ANGERS

Take the A87 in the direction of La Roche-sur-Yon for about 52km.

Take exit 26 "Cholet-centre".

At the roundabout, take the second right (avenue d'Angers).

At the roundabout, take the third exit (av. du Saint Laurent).

At the next roundabout, continue straight ahead.

At the roundabout, take the first right (avenue des Grands Lacs).

Continue for 350m.

The visitor parking is in front of the reception.

FACTORY VISIT

⌘ Duration of the visit: approximately 2 to 3 hours

From moulding to shipping, via polyester cutting, come and discover or rediscover the 4 main stages in the manufacture of a Jeanneau Sun Odyssey.

Creation of
composite pieces *

Lay-up of fibreglass parts in the mould.
There are three moulding techniques:

1. Contact (entirely manual)
2. Infusion (in a vacuum, with a mould and plastic sheeting)
3. Injection (in a vacuum, with two moulds)

Finishing of
composite pieces *

The 5-axel robot cuts out GRP parts,
and after a first quality control check,
the fiberglass pieces are finished.

The first elements of technical
deck hardware are installed.

Assembly
lines

Assembly lines install wooden
elements, composites, and parts from
suppliers, all according to a predefined
production plan.

The wooden elements are preassembled
in the form of modules, and then installed
in the hull of the boat, in an «open air»
fashion.

Preparation
and shipping

There is a final check before
preparation for shipping.

The boat is tested in the pool,
and then subjected to the last visual quality
control before it is cleaned and wrapped
in protective plastic sheeting.

FACTORY RULES

YOUR SAFETY, OUR FIRST PRIORITY

For your safety and that of people building the boats, we ask that you take careful note of the safety rules enforced within our production facility.

In keeping with these rules, we ask that you wear shoes that are flat and close-toed. If by any chance you own a pair of safety shoes, feel free to bring them.

Personal protective equipment is available on site.

Workshops are not accessible to wheelchairs and baby carriages.

We thank you, in advance, for your understanding.

Do not smoke
or vape

Photographs are
not allowed

Do not touch the pieces
under construction
(risk of splinters)

Do not touch
chemical products

Pets are
not allowed

Do not pass under
a moving load

On the boats,
respect the safeguards
put in place
(risk of falling)

Watch out for
material-handling
equipment

Use the secure
walkways

Wearing safety boots
is mandatory
